Objective

A position as a software developer engaging in GUI development where I can continuously learn and be able to function independently as well as part of a close-knit team.

Education

2013 – 2014	University of California	Online

Mobile Application Development Certificate
- Currently a 4.0 GPA with 13.5 of 15 credits completed.

1998 – 2000	Pacific Lutheran University	Tacoma, WA

BA in Computer Science
- Completed college course work in 2 years.

1996 – 1998	Tacoma Community College	Tacoma, WA

Associate Degree in Arts and Sciences
- Completed my AAS during my Junior and Senior years of high school.

Experience

May 2002 – Current	The Boeing Company	Kent, WA

Embedded Software Engineer
- Member of both small and large teams for the AEW&C Wedgetail and Peace Eagle programs. Designed and developed GUI software for the aircraft operators using a variety of languages and methodologies. Responsible for development from graphical designs and specifications. Collaborated with other team members through each stage in the software development life cycle.

Aug. 2001 – March 2002	NextDelta Solutions	Seattle, WA

Web Application Developer
- Designed and developed UI for the redesign of the Data Developer Program for AT&T Wireless. Additionally, became integral member of development in JHTML.

Sept. 2000 – July 2001	Fuze Technologies	Seattle, WA

Web Application Developer
- Member of 9-person project team developing FUZE Q&A, a web-based knowledge management and eService product. Personally responsible for significant client-side and server-side development.
  - Fuze Q&A - http://www.fuzedigital.com/default.aspx
- Successfully implemented several mid-sized web-based projects using both client-side and server-side technologies in a multi-tiered environment, including ASP, HTML, DHTML, JavaScript and SQL Server. Member of 4-6 person teams as well as sole developer on two projects. Responsible for coding from functional specifications and UI style guides. Collaborated with other technical team members on design and architectural issues.

Software

- Significant web development experience involving MS IIS 5, MS Visual Studio 6, SQL Server 7, and mySQL.
- Significant usage of Windows OS, Unix OS, MS Office, Rational ClearCase, and Rational ClearQuest.

Languages

- Significant web development utilizing PHP, ASP, HTML, JavaScript, DHTML and CSS.
- Significant software development utilizing C++, Java, and Gallium InterMAPhics.
- Working knowledge of Android and iOS mobile application development.
